

MeMo v1.1/v1.2 mapning

November 2024

Information omkring MeMo v1.1/v1.2 mapning

Konversionstabel

Som en del af den samtidige understøttelse af flere forskellige versioner af MeMo, vil Digital Post løsningen mappe fra modtagne meddelelser i v1.1 format og mappe til v1.1, hvor modtagersystemer har designet at modtage i dette.

Herunder ses de berørte felter og hvordan de bliver håndteret.

Generel strategi

Old version	New version	When upgrading	When downgrading
Does not exist	New required field	Requires a non-breaking default value to be defined	Ignored
Does not exist	New optional field	Can be ignored and left empty	Ignored
Optional Field	Required field	If missing require a non-breaking default value	Unchanged
Required Field	Optional Field	Unchanged	If missing require a non-breaking default value
Optional Field	Removed	Removed	Ignored
Required Field	Removed	Removed	Set to a non-breaking default value

v1.1 → v1.2

Source Field	Condition	Destination Field	Result
memo:memoVersion	Equals "1.1" or any other value	memo:memoVersion	Set to "1.2"
memo:memoSchVersion	Exists	memo:memoSchVersion	Removed

memo:reply, memo:replyData	memo:reply equals true and memo:replyData does not exist	memo:replyData	Added messageUUID to memo:replyData
-------------------------------	---	----------------	-------------------------------------

v1.2 → v1.1

Source Field	Condition	Destination Field	Result
memo:memoVersion	Equals “1.2”	memo:memoVersion	Set to “1.1”
memo:Representative.representativeID	Exists	memo:ContentResponsible.contentResponsibleID	Mapped 1:1*
memo:Representative.label	Exists	memo:ContentResponsible.label	Mapped 1:1*
memo:legalNotification	Does not exist	memo:legalNotification	Set to false
memo:mandatory	Does not exist	memo:mandatory	Set to false
memo:notification	Larger than 150 characters	memo:notification	Crop first 147 characters and add 3 characters: '...' to the end
memo:memoSchVersion	Doesn't exist	memo:memoSchVersion	set to “1.1.0”
